Business-class mobile service

Available with

Gamma MultiNet®

Gamma Mobile

The flexibility and quality of service you deserve from your mobile network

What makes us different?

- ▶ We own the core mobile network:
 - we have all the control so you have all the flexibility
 - easier for you to manage your mobiles
 - make adds/changes much more quickly
- ▶ MultiNet:
 - the power of multiple networks in one SIM
 - better coverage than a single network
- ▶ Built for business:
 - business-centric voicemail
 - great range of features designed specifically for business
- ▶ Fixed/mobile convergence roadmap prepares your business for the future
- ▶ 4G as standard
- ▶ A focus on customer service:
 - the same service excellence we already deliver for our other telecom services

Gamma MultiNet®

The power of multiple networks in one SIM

Mobile network reliability and the best possible coverage are essential for any business. With this in mind we have developed our new MultiNet bolt-on.

Unlike other single mobile networks, MultiNet rips up the rulebook by giving you access to multiple networks for better coverage. So, provided there is coverage from an available mobile network, with Gamma MultiNet you can always make and receive calls.

More signal means more opportunity to do more business. While your competitors are looking for signal or having to rely on voicemail, MultiNet gives you more opportunity to carry on working.

Gamma MultiNet is mobile without boundaries - if the primary network is unreachable, your handset will pick up the strongest network available so you can continue with your business as normal.

MultiNet works on many smartphones and doesn't require a mobile app, making it even easier for you to stay connected.

- ▶ No more moving around trying to find single network coverage
- ▶ Enables delivery of superior customer service for your customers
- ▶ Stand out from the competition - be in contact with customers for longer and with faster response times
- ▶ Save money - no need for multiple providers
- ▶ Boost business productivity - stay connected wherever there is signal available
- ▶ Spend more time working and less time listening to voicemail

A business-class network

Because we only cater for the business market we understand the challenges you face and we're committed to delivering solutions, tariffs and support that help you focus on your business. We also understand that we need to deliver these solutions on the back of an extensive and reliable network, which is why we've built our own.

We're already one of the UK's largest providers of fixed voice services and applications for thousands of UK businesses, and you can rest assured we have applied the same expertise and experience into making our mobile network and support services business-class and to the highest reliability also.

Flexible tariffs

We offer a range of mobile tariffs including pay-as-you-use, single user, shared user and unlimited, as well as a selection of bolt-ons including text, data, international roaming and our unique MultiNet service. Alternatively, we can work with you to find a bespoke package that suits your needs.

Lower overall costs

Choose from a range of bundled minutes packages or our simple pay-as-you-use tariff backed up by our preferential fixed / mobile and mobile / fixed on-net rates.

Keep your number

No need to update your business cards – it's easy to port your existing number onto the Gamma network or take out a new one.

Enables flexible working

Gamma Mobile lets you access everything you need to keep working no matter where you are. Our services support access to email, calendar and tasks on the move as well as the internet and your company LAN. Subscribe to our mobile and fixed-line offers and receive our competitive on-net rates, enabling you to link your fixed and mobile estates together, giving you a truly flexible working environment.

Business continuity

Unexpected events such as snow, floods, strike or roadworks needn't disrupt business. Gamma Mobile can easily integrate with your fixed-line infrastructure to become the key form of communication in such an event.

Fixed / mobile convergence

As a fixed-line network and now with the addition of our own core mobile network, we can offer highly competitive on-net rates and are in an ideal position to make fixed / mobile convergence an affordable reality for your business.

Why Gamma Mobile is ideal for your business

Gamma Mobile includes a number of services and tariffs to suit a wide range of businesses and our unique on-net tariffs are ideal for organisations looking to integrate mobile and fixed-line telephony.

Built for business

Our network is designed with business users in mind, from ensuring the best possible coverage with our MultiNet service through to a great range of standard and optional features including business-grade voicemail. If you're looking for a personal service from a provider with its own reliable established network, Gamma Mobile is the ideal choice.

Better coverage

Being contactable when you are mobile is key to doing business well. Now there's no need for multiple provider contracts for your business because, wherever your offices are located in the UK, Gamma Mobile's MultiNet bolt-on enables the SIM to automatically pick up the next strongest available mobile network should the primary network not be available. So, while your competitors are out of signal and their calls are going through to voicemail, you keep working - making your business more accessible for customers.

Business travel

Avoid bill shock and unexpected data charges when overseas. With Gamma Mobile you can control your expenditure when roaming with our range of Business Traveller bolt-ons to suit your schedule.

Data when you need it

We have a range of cost-effective tariffs to suit any requirement. Whether it's mobile broadband, email or both; by tethering a device to a laptop our data network will give you the speeds and connectivity you need. We know how important it is to stay connected which is why we won't cut users off when they reach their threshold, instead we'll send an alert letting them know they're reaching their limit.

Keeping employees connected at all times

Gamma Mobile is ideal for companies who need to be in constant contact with their mobile users, whether it is via voice or email. Our position as a fixed-line and mobile provider means you can benefit from preferential on-net rates.

Service excellence

Gamma is also committed to excellence in customer service and support - it's what makes us stand out from our competitors. Our UK support teams are co-located so you can always get through to the right person to handle your query, and our teams are experts in both fault resolution and provisioning.
